**DETAILED ACTION*****Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species of the claimed invention: Species 1 is a semiconductor substrate processing apparatus comprising multiple processing units that are interchangeable and also comprising dry carrying-in and carrying-out sections. The species is illustrated in Figures 2-25 and 42-51 (also see disclosure beginning at page 37, row 5). A mutually exclusive characteristic of this species is the interchangeability of the units. Also, the presence of a bevel-etching unit is a mutually exclusive characteristic. Species 2 is a semiconductor substrate processing apparatus comprising an electroless, plated metal film-forming unit with a holding portion, a peripheral edge seal, an anode and a cathode. The species is illustrated in Figures 26-29 and description begins at page 109, line 11. Each of the holding portion, peripheral edge seal, anode and cathode are mutually exclusive characteristics of the species. Species 3 is a substrate processing apparatus comprising a sensor for detecting substrate surface state that is provided near a substrate-carry in and carry-out opening of said substrate processing module or near a position in said substrate processing module at which said substrate is processed, and a state of substrate surface is detected based on a signal. The species is illustrated in Figures 30-39 and described beginning at page 124, line 12. A mutually exclusive characteristic is the sensor.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is fully generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 1763

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karla Moore whose telephone number is 571.272.1440. The examiner can normally be reached on Monday-Friday, 8:30am-5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory Mills can be reached on 571.272.1439. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
